RE: Draft TI Comments on FDA Regulations

Marc Firestone has asked that I circulate the attached portion of the draft TI comments to the FDA docket for your review and comment. Of particular note are those issues which may relate to PM's Action Against Access program.

I am including the two cover notes from D. Remes for your information. Please note that the advertising white paper has been incorporated into the binder you will receive.

We would appreciate your feedback on this portion no later than COB Wednesday, November 29. Additional sections and/or revisions of the draft will be circulated in the coming weeks.

Thanks in advance for your ongoing assistance.
